

JOE SEBASTIAN

SOFTWARE ENGINEER | AI PRODUCT BUILDER

Chennai, India | joe27sebastian@gmail.com | www.joe07.site | github.com/joe2708 | +91 6385486026

SUMMARY

Software Engineer with 1.5+ years of professional experience and a track record of building and launching AI-powered consumer products. Experienced across the full product lifecycle - from development and AI integration to subscriptions, deployment, monetization, and growth. Comfortable using AI-assisted development to rapidly prototype, build, debug, and ship production-ready applications while maintaining code quality through testing and iteration.

PROFESSIONAL EXPERIENCE

Software Engineer, Flextronics

Mar 2024 - Oct 2025

- Built and maintained enterprise applications using Angular, TypeScript, .NET, and MySQL.
- Designed and implemented features, resolved defects, and participated in code reviews and Agile development.
- Prepared release builds, pushed approved artifacts to AWS-managed environments, and verified application functionality before release.

Independent Software Engineer & AI Product Builder

Oct 2025 - Present

- Built and launched multiple consumer AI products, owning the full product lifecycle from idea to launch, monetization, and distribution.
- Developed Finta, a subscription-based expense tracker with onboarding, RevenueCat integration, local SQLite storage, and \$20 ARR.
- Built an iOS digital wellbeing app featuring Screen Time controls, custom iOS alarms, Apple Health integration, gamification, a personalized AI chatbot that adapts to each user's digital wellbeing journey, AI-powered features, Supabase/PostgreSQL, Cloudflare Workers, rate limiting, and scheduled background jobs. Currently focused on growth, user acquisition, and distribution.
- Developing DreamCraft, an AI image and video generation platform with unified access to multiple AI models, advanced image/video editing, and AI-powered media workflows.
- Created an open-source BYOK AI Job Assistant for AI-powered resume analysis and job matching.
- Contributed to react-native-device-activity to support functionality required for Breakify's Screen Time integration.

SKILLS

- **Languages:** TypeScript, JavaScript, Python, Swift, C#, SQL
- **Frontend & Mobile:** React Native, React, Expo, Next.js, Angular, Tailwind CSS, Vite
- **Backend & Cloud:** Cloudflare Workers, Supabase, PostgreSQL, SQLite, MySQL, REST APIs, Webhooks, Vercel
- **AI & Generative AI:** OpenAI API, Gemini API, Runware, Hugging Face, LLM Integration, AI Agents
- **Tools:** Git, GitHub, Canva, AI-assisted development (Cursor, Claude Code, Codex CLI, Gemini CLI, OpenCode, CodeRabbit)

EDUCATION

2020 - 2024

B.E. Computer Science & Engineering . Loyola-ICAM (LICET), Chennai . CGPA 8.3

Additional information : Built ShareMeal, a food-sharing app shortlisted for the final round of a government-organized competition.
